ACTIVE SECRET CLEARANCE | U.S. Navy Veteran

PROFESSIONAL SUMMARY

IT operations and systems support professional, veteran, and former healthcare technician with experience troubleshooting technical issues, maintaining service continuity, documenting root-cause findings, and coordinating support across customers, vendors, and cross-functional teams. Background includes hands-on training in Windows Server, Azure, Active Directory, networking, Incident management, and technical documentation. Known for calm problem-solving, customer-focused support, and the ability to translate complex issues into clear next steps in high-pressure environments.

TECHNICAL SKILLS

IT Operations: Technical Support | Troubleshooting | Endpoint Support | Incident Management | Escalations | SLA Support | Root Cause Analysis | Service Continuity | Remote Administration | Technical Documentation | Intune

Systems & Cloud: Windows Server | Microsoft Azure | Active Directory Domain Services | DNS | DHCP | TCP/IP | Hyper-V | Linux | Microsoft 365 | Microsoft Entra ID

ITSM & Platforms: ServiceNow | ITIL 4 Foundations | Change Management | Jira | Service Channel

Scripting & Tools: PowerShell | Bash | Python | JavaScript | HTML | CSS | GitHub | VS Code | MYSQL | Docker

Security & Identity Fundamentals: RBAC | MFA | SSO | Firewall/VPN Concepts

EDUCATION & CERTIFICATIONS

Bachelor of Computer Software Technology University of Arizona Global Campus	March 2026
Microsoft Azure Fundamentals (AZ-900)	May 2026
CompTIA Network+	Expected August 2026

TECHNICAL PROJECTS

Project Autumn: An enterprise cloud infrastructure lab simulating real-world system administration and operational troubleshooting.

The Pulse: A sports information platform built to apply web development and testing concepts.

Portfolio Website: A personal website showcasing technical Projects, documentation, and technical communication.

Portfolio: [Shanae Revell](#)

PROFESSIONAL EXPERIENCE

CLOUD & SYSTEMS ADMINISTRATION PARTICIPANT MSSA Remote	Apr 2026 - Current
- Completed 300+ hours of hands-on cloud and systems administration training, configuring Windows Server, Azure services, Active Directory, DNS, DHCP, Group Policy, remote access, and VPN connectivity in lab environments. - Utilized PowerShell to automate administrative tasks and system management activities while leveraging Git and GitHub for version control, documentation management, and collaborative project workflows. - Applied Microsoft Entra ID concepts, including role-based access, authentication, MFA, and identity lifecycle management within cloud and hybrid identity scenarios.	

TECHNICAL SUPPORT | HME | Remote**Jul 2025 – Dec 2025**

- Delivered end-user support and operational troubleshooting for comms systems, diagnosed failures, analyzed root causes, and resolved those issues for customers and 3rd party field vendors.
- Coordinated device replacements, equipment exchanges, and field service dispatches to minimize operational disruption and maintain service continuity.
- Maintained detailed service documentation, troubleshooting records, and support case histories to improve issue tracking, escalations, and knowledge sharing.
- Investigated recurring system anomalies, documented findings, and recommended corrective actions to improve operational reliability and reduce repeat incidents.

FIELD IT TECHNICIAN | DRG | San Diego, CA**Jan 2025 – Jul 2025**

- Supported store technology operations across multiple franchise locations within a 25,000-square-mile service area, helping maintain SLA compliance and business continuity.
- Installed, configured, and troubleshot network-connected devices, including POS systems, payment terminals, digital menu boards, and audio equipment, to maintain uninterrupted store operations.
- Investigated urgent field incidents, isolated root causes, and coordinated vendor repairs to minimize downtime in high-tempo environments.
- Documented service actions, equipment status, future maintenance planning, troubleshooting steps, and recurring issues to support repeatable resolution.

CLOUD PLATFORM INTERN | ServiceNow | Remote**Jul 2024 – Oct 2024**

- Completed 600+ hours of hands-on ServiceNow platform training focused on ITSM workflows, incident management, change management, platform configuration, and enterprise service delivery.
- Configured and administered SaaS based applications supporting Incident Management, Change Management, and ITSM workflows.
- Built dashboards and reports using ServiceNow Performance Analytics to track KPIs and improve visibility into service operations.
- Applied ITIL-based practices by documenting workflows, supporting process automation, and aligning platform tasks with service management standards.

PHYSICAL THERAPY TECHNICIAN | US NAVY**DEC 2018 – Dec 2024**

- Supported rehabilitation and mission readiness for 3,000+ service members and beneficiaries, helping patients recover, maintain mobility, and return to daily duties.
- Assisted with clinical procedures, care coordination, patient documentation, and medical protocol compliance in a high-tempo military healthcare environment to support safe, consistent, and mission-focused care delivery.
- Delivered therapeutic exercise support, patient education, mobility training, and treatment assistance to improve recovery outcomes and long-term adherence.

Repair Agent | Geek Squad | Baltimore, MD**OCT 2016 – APR 2020**

- Delivered end-user technical support for computers, mobile devices, and consumer technology, diagnosing failures and resolving hardware and software issues.
- Investigated customer-reported incidents, isolated root causes, and recommended corrective actions to restore functionality and minimize disruption.
- Maintained detailed service documentation, repair records, and support histories to improve issue tracking, customer communication, and resolution consistency.
